REMARKABLE RESULTS

We continually challenge the edges of what others think cannot be achieved. One record-breaker who is a consultant to our team set a world record not by the typical small increment but by being 15 times faster than anyone in history.

What record-setting results can you achieve with the right advice from a team that sees new opportunity where others only see limits?

One example of results achieved by leaders and teams who work with us.

Robert Cooper, PH.D

Robert Cooper, Ph.D., is the founder and CEO of Cooper Strategic. He is a neuroscientist, New York Times bestselling author (with over 4 million books sold), and a leading high-performance business strategist.

Called “a national treasure” by Professor Emeritus Michael Ray, Ph.D., of the Stanford University Graduate School of Business, Cooper emphasizes scientifically based insights, ultra-practical tools, counterintuitive wisdom, and disciplined metrics. He recently earned a second Ph.D., at University College London, conducting original research on where learning meets initiative in the brains, time and performance of exceptional leaders and teams. From industry nominations, experts, and an independent panel of judges interviewing CEOs, Cooper was named one of the “**Most Influential Thinkers**” for his impact on leadership and people strategy—“a definitive list of the top influencers who challenge conventional thinking, are visionary and transformational, bring credibility both inside and outside the business, command the respect of peers and key stakeholders, and add real value to the business.”
